This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk. **Important Note:** Do not use any tank-mix if the mixture cannot be applied within the label recommendations for individual products or if specific tank-mix restrictions apply. Larger, more complicated mixes, unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank-mix request please contact your local Corteva representative or call the Technical Hotline on 0800 689 8899. Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, PH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Spray able with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

NOTES

Broadway Star should always be used with an approved adjuvant.

Topik is supported in mix with Broadway Star up to the end of February.

Ø Residual herbicides can be used in mixture or short sequence with Broadway Star, while conditions are favourable for both products to work and weeds are small and actively growing. However, once soil moisture declines to reduce residual activity then a **4 week** interval between the residual herbicide and an application of Broadway Star is recommended to maximise grass weed control and the tank-mix is no longer supported.

* Do not exceed maximum total dose of florasulam within growing season

** Do not use this mix if the crop is under stress as there is the increased risk of an additive PGR effect and possible crop damage

† Corteva Agriscience only support Broadway Star in a 2-way tank mix with half rate chlormequat due to crop safety issues. An intervals of at least **7 days** must be regarded before applying a higher rate of chlormequat or any other PGR.

Do not mix Broadway Star With OPs, MCPA and Dicamba

For products containing MCPA or Dicamba respect a 14 day interval between them and Broadway Star.

Do not harrow or roll within 7 days before or after an application of Broadway Star.

Updates

Products Removed - Absolute, Ally Express, Aria, Bullion, Ductis SX, Exceed SX, Excalibur, GEX 353, Headland Surefire Gold, Image, Lexus SX, Oklar SX, Oriol SX, Oxytril CM, Primus 25EC, Quantum SX, Staka SX, Triad, Acanto, Acanto Prima, Centaur, Demeo, Ennobe, Excelsior, Flamenco, Landmark, Menara, Olympus SC, Orka, Poraz, Torch, Torch Extra, Dimethoate
26th November 2019 - added Lantern, Tower

22nd January 2020 - changed Toppel 10 to Permesect 500 EC; 28th January 2021 - removal of withdrawn products; 15th March 2021 - addition of Azoxystar; 22nd March 2021 - addition of Calrite Extra, Firefly, Impact, Iodus, Multiple Pro, Sakura and Terrasorb Foliar Extra, removal of multi-way mixes with Defy; 23rd March 2021 - addition of Biopower, Monkey and Orius P; 24th March 2021 - addition of Nelson; 13th April 2021 - addition of Revystar XE and alternative brands, Diadem XE, Mivyo XE, Provyto XE, and Verydor XE; 29th April 2021 - updated list to include Silvron Pro, Kavatur Plus, Myresa, Sven and additional trace elements; 9th March 2022 - removal of withdrawn products and addition of Spryte Aqua CF; 3rd May 2022 - Addition of Ascra Xpro +/- Duplosan KV; 3rd November 2022 - Support level for Toledo and Ulysses products changed; 8th December 2022 addition of Sentinel; 1st Feb 23 addition of Guardian; 9th May 2023 - addition of NTS Triple Ten; 17th October 23 - addition of Tower as a separate entry; 19th March 24 - addition of Stem
