

Zorvec Endavia® – for control of Downy Mildew (*Peronospora destructor*) in Bulb Onions, Garlic and Shallots

Key facts

Product Registration Number:	PCS 06222
Active Ingredient:	70 g/L benthialavdicarb and 30 g/L oxathiapiprolin, FRAC Groups 40 + 49
Formulation:	Oil Dispersion
Application Rate:	0.5L/ha
Maximum No. of Applications:	3 per crop (max 2 in block)
Water Volume:	Minimum 200 litres of water per hectare
Rainfastness:	1 hour
PHI:	28 Days
Buffer Zone:	Respect an unsprayed buffer zone of 1m to surface water bodies.

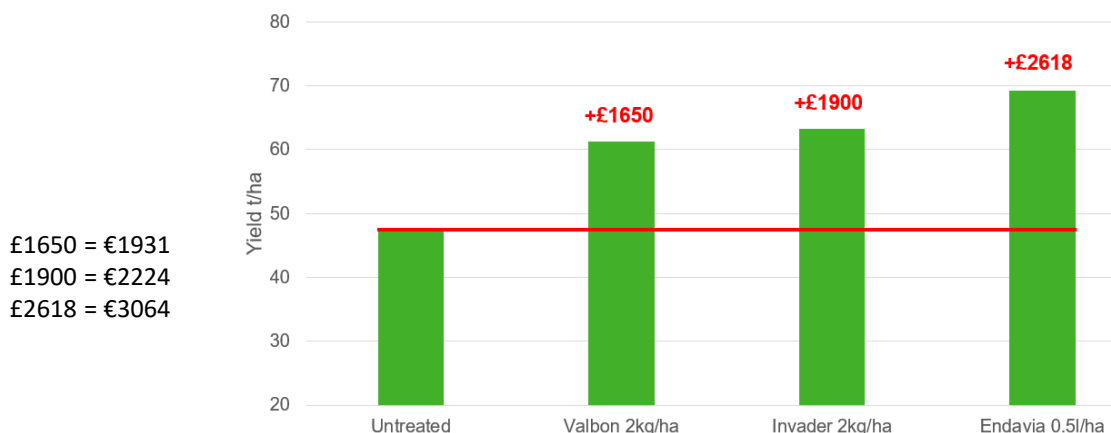

Why use

- Zorvec Endavia provides unrivalled preventative activity versus downy mildew (*P. destructor*) in bulb onions.
- Using Zorvec Endavia delivers two AIs from different fungicide groups, ensuring a robust anti-resistance strategy; oxathiapiprolin (FRAC group 49) and benthialavdicarb (FRAC group 40).
- Use early in the downy mildew programme to prevent disease establishing in the crop and preserve both yield and quality.
- Can be used on all varieties from the 3-leaf stage of growth.
- Begin at first sight of disease in the crop with Zorvec Endavia at 0.5L/ha, to achieve 7 days protection against onion downy mildew.
- Apply a second application of Zorvec Endavia at 0.5L/ha at T1 + 7 days to establish a clean base within the crop, switching to an alternative chemical group for the next 1-2 applications.
- Retain the remaining application for use later in the fungicide programme but be aware of the 28-day PHI.
