

# Freestyle™

## HERBICIDE

More flexibility. More control. You're the boss.

Freestyle herbicide makes early season weed control in soybeans simple and effective. With a wide window of application from pre-plant to early post-emergence, it provides enhanced residual control of grass and broadleaf weeds, including Eastern black nightshade and velvetleaf.

- Early season residual weed control
- Improves the control of key weeds such as Eastern black nightshade
- Wide window from preplant to early post-emergence
- Fits any soybean production system – conventional or glyphosate tolerant including Roundup Ready 2 Xtend™ and Enlist E3™ soybeans

### WEEDS CONTROLLED

Broadleaf Weeds	Grass Weeds
<ul style="list-style-type: none"> <li>• Annual sow thistle<sup>1</sup></li> <li>• Prickly lettuce<sup>1</sup></li> <li>• Dandelion<sup>1</sup></li> <li>• Lady's-thumb</li> <li>• Eastern black nightshade</li> <li>• Lamb's-quarters</li> <li>• Redroot pigweed</li> <li>• Smartweed</li> <li>• Velvetleaf</li> <li>• Wild buckwheat</li> <li>• Wild mustard</li> </ul>	<ul style="list-style-type: none"> <li>• Green foxtail</li> <li>• Yellow foxtail</li> <li>• Barnyard grass</li> <li>• Old witchgrass</li> <li>• Proso millet<sup>2</sup></li> <li>• Yellow nutsedge</li> </ul>
<p><sup>1</sup>Pre-plant burndown applications. <sup>2</sup>Partial control.</p>	

### HOW TO USE

#### Glyphosate Tolerant Soybeans (Including Roundup Ready 2 Xtend and Enlist E3™ soybeans)

##### Early Preplant or Pre-emergence:

- 20 acres per case
- Removes early season weed pressure
- For burndown applications tank-mix with glyphosate
- Follow up early Post-emergence with glyphosate and other registered herbicides

##### Early Post for GT Soybeans:

- 30 acres per case
- Adds residual weed control
- Tank-mix with 0.67 – 1 L/ac of a 540 g/L glyphosate (No additional surfactant required).
- Apply POST up to the 3rd trifoliolate and before soybeans begin to flower
- POST applications of Freestyle may shorten the internodes and stunt soybeans but will not result in yield reduction.

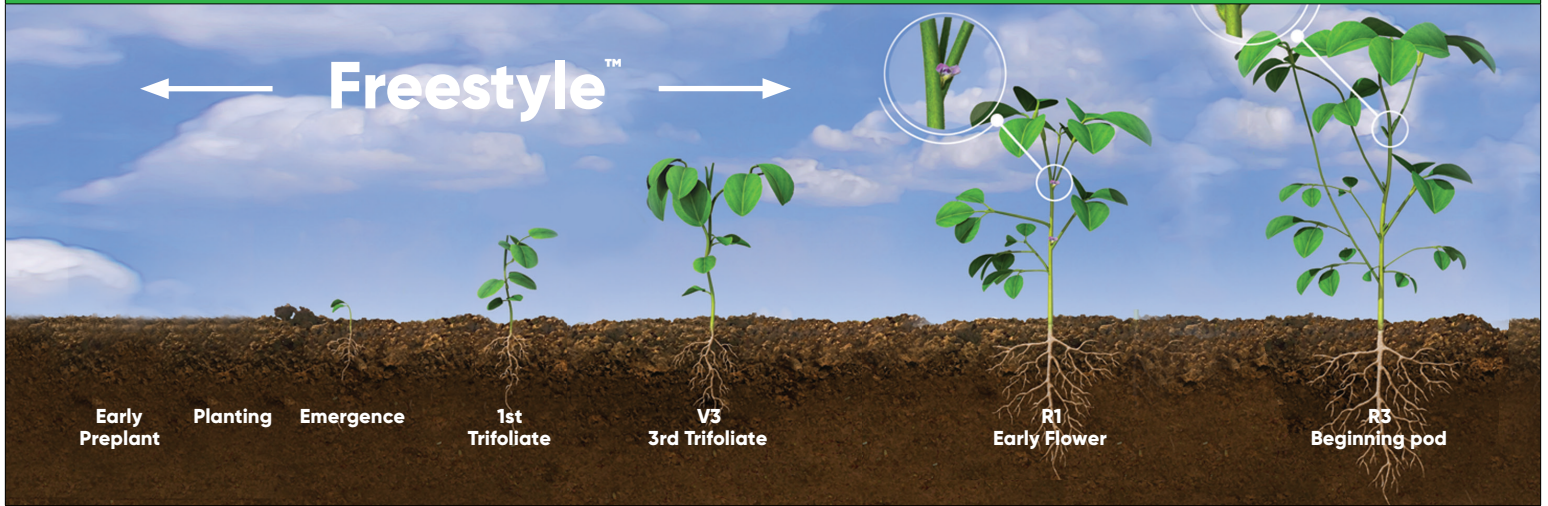

#### Non-GM Soybeans

##### Early Preplant or Pre-emergence:

- 20 acres per case
- Tank-mix with a grass herbicide which will provide additional weed spectrum and modes of action. Example – Boundary LQD.

**PACKAGING:** Convenient co-pack (Classic™ 288 gram jug + Imazethapyr 240 SL 2.5 L jug)
