

# Simplicity™ GoDRI™

## HERBICIDE

### Simplicity™ GoDRI™ vs. Simplicity™

While both Simplicity™ GoDRI™ and Simplicity™ provide the same high-performing grass and broadleaf\* weed control, the Simplicity™ GoDRI™ formulation offers a more convenient, easy to mix formulation that disperses rapidly and completely for fast mixing and spraying.

#### Benefits to the Retail:

Comparisons	Simplicity™ GoDRI™ HERBICIDE	Simplicity™ HERBICIDE
Acres per Pallet	15,360	3,200
Cases per Pallet	48	40
Heated Storage Required	No	Yes
Weight per Pallet (lbs.)	1213	2036

#### Farmer Mixing and Loading:

Comparisons	Simplicity™ GoDRI™ HERBICIDE	Simplicity™ HERBICIDE
# of People to Mix and Load	1	2
Time needed to Load	1:28	3:02
Efficiency Improvement	4x	-
Acres per Case	320	80
Group 2 Grass Control	✓	✓
Full Re-Cropping Freedom	✓	✓

#### Summary:

- Simplicity™ GoDRI™ and Simplicity™ have identical elite grass and broadleaf\* weed control performance, including control of Group 1 resistant wild oats.
- More time efficient loading and mixing with Simplicity™ GoDRI™ than Simplicity™.
  - a. The GoDRI™ formulation allows for rapid dispersion equaling less down time during spraying.
- Less containers are needed when spraying Simplicity™ GoDRI™.
- Simplicity™ GoDRI™ takes up less warehouse or on-farm storage space.
- Simplicity™ GoDRI™ containers empty completely and do not require extra time on the spike or to rinse and clean out after use.
- No strong ammonia odours commonly reported from the Water Conditioner in Simplicity™.
- Simplicity™ GoDRI™ disperses quickly and mixes easily, provided:
  - a. Correct mixing order is followed.
  - b. A reasonable amount of water is added to the tank/chemical handler before loading.
  - c. A short mixing period is allowed before the broadleaf tank mix partner is added.
  - d. The correct non-ionic surfactant is added (Agral 90, Sentry or Ag-Surf Original) to the tank last and @ 0.25% v/v.
- No difference in sprayer clean-out recommendation between the two formulations.
