Unleash best-in-class white mould protection for stronger and more vigorous soybeans

## WHY USE VIATUDE™ FUNGICIDE?

- Delivers best-in-class white mould protection from two of the strongest white mould actives
- Provides multiple effective modes of action with a unique combination of two highly effective active ingredients that both provide protection against white mould in soybeans
- Viatude™ fungicide with Onmira™ active protects plants inside and out against white mould

## Viatude Provides Premium White Mould Performance

- Viatude contains two highly effective white mould active ingredients providing multiple effective modes of action for resistance management.
- This combination of active ingredients and the all-in-one premix formulation results in superior plant protection.
- Multiple years of testing show Viatude consistently delivering industry leading white mould performance.

Viatude™

Untreated

## Viatude™ fungicide with Onmira™ active delivers excellent coverage and plant protection against white mould.

Systemic movement and coverage from a fungicide is critical for maximum protection in a dense soybean canopy. The Onmira active in Viatude fungicide is highly mobile, it quickly and efficiently surrounds, penetrates, and protects the leaf and stem from white mould infection. The advanced movement properties of Viatude fungicide help deliver more premium protection.

### Application Information

<b>Crop</b>	Soybeans
<b>Disease</b>	White Mould
<b>Packaging</b>	Case: 2 x 8.91L Jugs Drum: 95.04L
<b>Rate</b>	0.297L/ac
<b>Acres Treated</b>	30 ac/jug (60 ac/case) 320 ac/drum
<b>Application Timing</b>	Apply prior to disease development.

### Mixing Instructions

1. Shake well before use.
2. Fill clean spray tank 1/4 - 1/2 full of water.
3. While agitating, add the required amount of Viatude Fungicide, continuing agitation until the product is completely dispersed.
4. Continue filling the tank with agitation
