Unleash best-in-class sclerotinia protection for stronger and more vigorous canola

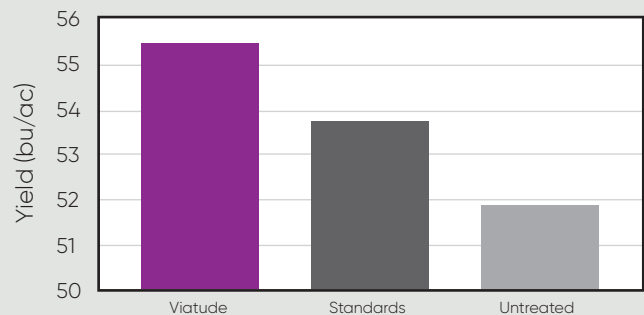

WHY USE VIATUDE™ FUNGICIDE?

- Delivers best-in-class sclerotinia protection from two of the strongest sclerotinia actives
- Provides multiple modes of action with a unique combination of two highly effective active ingredients that both provide protection against sclerotinia in canola
- Viatude™ fungicide with Onmira™ active protects plants inside and out against sclerotinia

Viatude Provides Premium Sclerotinia Performance

- Viatude contains two highly effective sclerotinia active ingredients providing multiple modes of action for resistance management.
- This combination of active ingredients and the all-in-one premix formulation results in superior plant protection.
- 2022 field scale trials show Viatude consistently outperforms current standard fungicides, delivering a 1.6 bu/ac yield advantage.

Viatude™ fungicide with Onmira™ active delivers excellent coverage and plant protection against sclerotinia.

Systemic movement and coverage from a fungicide is critical for maximum protection in a dense canola canopy. The Onmira active in Viatude fungicide is highly mobile, it quickly and efficiently surrounds, penetrates, and protects the leaf and stem from sclerotinia infection. The advanced movement properties of Viatude fungicide help deliver more premium protection.

Application Information

Crop	Canola Soybeans
Disease	Sclerotinia
Packaging	Case: 2 x 8.91L Jugs Drum: 95.04L
Rate	0.297L/ac
Acres Treated	30 ac/jug (60 ac/case) 320 ac/drum
Application Timing	Canola: Begin applications before or at onset of infection. Soybeans: Apply prior to disease development.

Mixing Instructions

1. Shake well before use.
2. Fill clean spray tank 1/4 - 1/2 full of water.
3. While agitating, add the required amount of Viatude Fungicide, continuing agitation until the product is completely dispersed.
4. Continue filling the tank with agitation

Viatude Field Performance Sclerotinia Incidence in Canola

Viatude reduced sclerotinia incidence in canola greater than the current standards.*

Viatude significantly reduces sclerotinia incidence
