

Confront®

SPECIALTY HERBICIDE

One of the best ways to control broadleaf weeds in established cool-season and warm-season nonresidential turf continues to be Confront® specialty herbicide.

A nonphenoxy herbicide, Confront is ideal for parks, golf courses, commercial grounds, cemeteries and schools. It provides superior postemergence control of more than 35 difficult-to-manage species of broadleaf weeds, including clover, dandelion, oxalis and thistle. Confront is not labeled for use on residential turf.

When applied to healthy, well-established turf, Confront can be used with little risk of damaging or discoloring turf. Confront provides 12 weeks of control of tough broadleaf weeds with one application.

How Confront® specialty herbicide works

Confront® specialty herbicide works by penetrating the tough outer-leaf coating of emerged weeds before moving through the plant to the roots. Once in the plant system, Confront stimulates it to outgrow its food reserve. Unlike other products that only burn back weeds (allowing them to return in a matter of weeks), Confront knocks down weeds – roots and all.

Broad-spectrum broadleaf control

As a broad-spectrum herbicide, Confront® specialty herbicide provides effective postemergence control of a wide variety of broadleaf weeds, including:

- Black medic
- Broadleaf plantain
- Burdock
- Canada thistle
- Chickweed
- Clover (red, hop and white)
- Cocklebur
- Coffeeweed
- Common ragweed
- Common vetch
- Common yellow woodsorrel
- Creeping and dwarf beggarweed
- Creeping woodsorrel
- Curly dock
- Dandelion
- English lawn daisy
- Goldenrod
- Ground ivy
- Hawkweed
- Henbit
- Lambsquarters
- Lespedeza
- Matchweed
- Mouse-ear chickweed
- Musk thistle
- Oxalis
- Poison ivy
- Prostrate spurge
- Round leaf mallow
- Sheep sorrel
- Shepherd's purse
- Smartweed
- Spotted catsear
- Spurweed
- Virginia pepperweed
- Wild buckwheat
- Wild violet

Turf recommendations

Confront® specialty herbicide is recommended for use on most established cool- and warm-season nonresidential turfgrass, including:

- Bahiagrass
- Bentgrass
- Bermudagrass
- Bluegrass, perennial (Kentucky)
- Centipedegrass
- Fescue
- Fescue, chewing
- Fescue, sheeps
- Fescue, tall
- Ryegrass, perennial
- Zoysiagrass

Active ingredients

Confront contains the active ingredients triclopyr and clopyralid. Each of these controls a broad spectrum of weeds. Triclopyr works well on many hard-to-control weeds such as wild violet and oxalis. Clopyralid controls common weeds such as clover, dandelion, plantain and thistle. Together, the two chemistries form an unbeatable duo.

How to apply

Use Confront for broadcast applications or in portable sprayers for spot treatments from early spring through fall when broadleaf weeds are actively growing. Tank-mix Confront with a preemergence product such as Gallery® specialty herbicide to increase the spectrum of broadleaf weed control, or mix with fertilizers for application convenience. Refer to the product label for specific rates and recommendations.

Application precautions

Confront can be applied to sensitive turfgrass, but the following precautions must be noted:

- Do not apply Confront to St. Augustinegrass.
- Do not treat warm-season turfgrass with Confront when the mowing height is less than a ½ inch.
- Do not apply Confront on turf that is not well established or on turf that is stressed or weakened because of unfavorable climate conditions, temperature extremes, nematodes or other factors.
- Delay reseeding for at least three weeks after applying Confront.
- Do not use grass clippings from turf treated with Confront for mulch or compost.
- Do not use Confront on golf course putting greens or tees or on turf being grown for sale, research or commercial seed production.
- Do not use on residential turf.

KEY BENEFITS

- Versatility. It can be used in numerous varieties of warm-season and cool-season nonresidential turfgrass.
- Effectiveness. When used according to label directions, Confront® specialty herbicide provides exceptional control of 35 species of hard-to-control broadleaf weeds.
- Economical. It provides broad-spectrum weed control with one application, saving the product and labor costs of repeat treatments.
- Low odor. Confront is an excellent choice for commercial grounds and public facilities.
