

# C-1019FI & C1020FI Premium Seed Treatments

C-1019FI and C-1020FI premium seed treatments offer unparalleled protection from the top yield-robbing diseases and pests, including Phytophthora and Pythium. These proven seed treatments provide confidence that farmers will see great results and improved yield. Multiple modes of action deliver consistent protection against the leading soybean diseases.

**C-1019FI and C-1020FI premium seed treatments both contain the industry-leading Lumisena® fungicide seed treatment.**

## Best-in-Class Protection Against Phytophthora

Protect your soybean plants from the number-one yield-robbing disease in soybeans, Phytophthora. In multi-year field trials across the U.S., Lumisena® fungicide seed treatment has been proven to significantly boost yields and plant stands under Phytophthora pressure versus the existing industry-standard seed treatment.

Yield benefit shown in  
638 trial locations\*

Yield benefit from field areas  
with higher susceptibility  
on 212 head-to-head trials

\*Versus the existing industry-standard treatment (Metalaxyl, 0.75 fl oz/cwt)
