

Intrepid Edge[®]

INSECTICIDE

Prepare now to control
yield-robbing pests

Features and Benefits

- Broad spectrum of Lepidoptera pest activity
- Fast knockdown
- Long residual control
- Convenience - no mixing needed
- Avoid potential disruption of beneficial insects caused by other insecticides
- Will not flare mites or aphids
- IPM compatible
- Two modes of action

Application Rates Soybean

Pest	Intrepid Edge [®] Rate (fl oz/A)
Soybean looper	
Fall Armyworm	4-6.4
Corn Earworm	

Restrictions

- **Pre-harvest interval:**
Do not apply within 28 days of seed harvest
- **Minimum treatment interval:** Do not make applications less than 4 days apart
- **Maximum number of applications:**
Do not make more than 4 applications per year

Soybean Looper control in soybeans Dr. Gus Lorenz, Lonoke, AR 2015

Chart 1. Number per 25 Sweeps 5-8 DAA

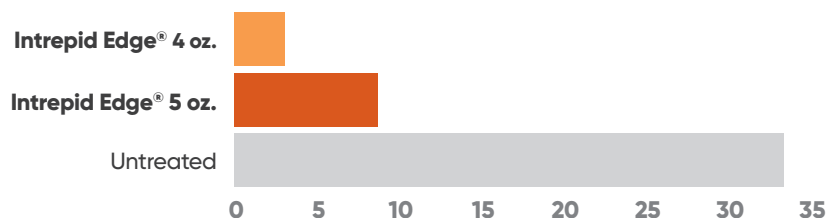

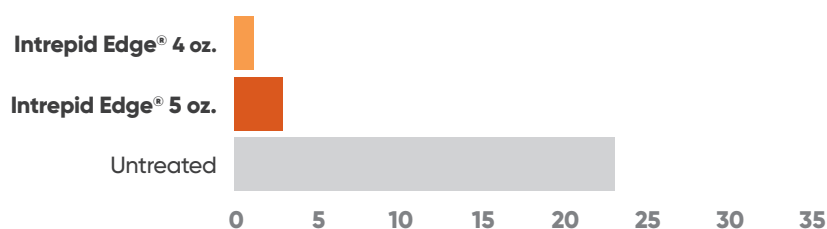

Chart 2. Number per 25 Sweeps 15-17 DAA

“It takes an insecticide like Intrepid Edge that has a fast knockdown and is proven to work well on large caterpillars. The fast knockdown also is important because the larger the caterpillar is, the more, and faster, it is going to eat.”

“I’ve been recommending Intrepid Edge based on the consistency it shows and that we’ve been finding soybean looper populations that appear to be resistant to other classes of insecticides.”

– Dominic Reisig, associate professor and entomology Extension specialist at North Carolina State University
